**Exxon Company U.S.A.  
Houston, TX**

This downtown Houston office building is 45 floors tall and over 35 years old. We started working on this building over 30 years ago and have provided maintenance on the building ever since. We have performed various types of work to include the following:

Re-caulking of the defective sealants of the marble joints, windows, mullions, and precast panels.

Replacing, repairing, and re-anchoring of defective marble joints.

Lining the reflective pool with an EPDM liner.

Waterproofing the floor of the mechanical room.

New roofs were installed; the 44th floor area had a vent system installed and the 45th floor area had a built-up roof installed.

**Kaanapali Alii  
Maui, HI**

This project consisted of a complete roof restoration which included power washing, repairs to the existing roof membrane, renewing flashings, and coating the roof & flashings with Missouri Paint & Varnish reflective aluminum coating.
